Rescue Services

When Your Life Is On The Line

WE ARE RESCUE

Titan Safety's experienced rescue technicians are fully trained to NFPA and OSHA standards. We are equipped to manage all confined space and high angle rescue requirements from inspection entry to full scale outages and turnarounds.

Stand By Crews

Titan Safety's Rescue Teams are On Call. All Day. Every Day. If you are conducting inspections or working in confined spaces, our rescue teams are ready providing on-site skilled professional services. Our teams are trained to recognize risks from physical and health hazards as well as equipment malfunctions.

Confined Space

Our confined space rescue teams have been extensively trained in CPR, rescue techniques, self-rescue, recognition of hazards, confined space permitting, entrant policies, safe work practices, attendant duties and responsibilities, and various other aspects of confined space rescue.

High Angle

We have trained personnel in high angle rescue. This type of rescue requires specific training in rope rescue techniques of the injured personnel. In addition, we can provide training for your in-house rescue teams.

We Are TITAN.
We Are SAFETY.

ON CALL. ALL DAY. EVERY DAY
